## **DETAILED ACTION**

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, 18-21 and 28-30, drawn to a clock distribution network, classified in class 327, subclass 297.
  - II. Claims 12-17, drawn to a circuit for correcting duty cycle having a reset path and a feedback path, classified in class 327, subclass 195.
  - III. Claims 22-25, drawn to an apparatus for correcting duty cycle having smart buffer circuit, classified in class 327, subclass 108.
  - IV. Claims 26-27, drawn to an apparatus for correcting duty cycle having a clock generation circuit to receive a reference voltage, classified in class 327, subclass 291.
  
2. The inventions are distinct, each from the other because of the following reasons:  
Inventions I and II, III, IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination group I as claimed does not require the particulars of the subcombination groups II, III and IV as claimed because the duty cycle correction circuit in group I does not require a specific reset path and feedback path in the duty cycle circuit of the subcombination

group II, the smart buffer circuit of the subcombination group III, and the clock generation circuit for receiving a reference voltage from the duty cycle correction circuit group IV. Each of the subcombinations has separate utility such as generating stable output signal due to feedback path (group II), buffering an output signal (group III), and adjusting the signal based on a reference voltage generated by a duty cycle correction circuit (group IV).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to the Attorney of record, Cynthia Faatz, on 2/5/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
